Breastfeeding Following Covid Jab: Reports from Mothers

by **Brian Shilhavy**
Editor, Health Impact News

Back in April this year we published a video commentary by [ReallyGraceful](#) where she reported that many mothers who were nursing their babies had their breast milk dry up after taking a COVID shot.

[...]

As more and more data is entered into the government Vaccine Adverse Event Reporting System (VAERS), we are now seeing cases where babies that are breastfed are suffering adverse reactions to the COVID shots that their mothers are taking. The shots have not yet been authorized for infants, although such an authorization is expected any day now.

[Celeste McGovern of LifeSite News reported on one case](#) where the breastfeeding baby died with blood clots, something rarely ever seen in infants, but a common side effect we are seeing with people who take the COVID shots, blood clots which the CDC states are “rare” in spite of the data in VAERS that shows over [10,000 cases of “thrombosis”](#), including 488 deaths.

VAERS [report ID 1532154](#) was apparently filed by the mother, a 36-year-old woman from New Mexico:

On July 17, my baby passed away.

I had been breastfeeding my 6 week old baby at the time that I received the first Pfizer vaccine on June 4, 2021.

He became very sick with a high fever about 2 weeks after I got the first Pfizer vaccine on June 21. He was treated for 2 weeks with IV antibiotics for a supposed bacterial infection.

However, they never found any specific bacteria, and called his diagnosis culture-negative sepsis. At the end of his hospital stay he tested positive for rhinovirus.

I ran a search in the VAERS database to see how many other reports have been filed with mothers who are breastfeeding babies, and came up with 94 cases, which included [one other infant death](#). [\(Source.\)](#)

The other breastfeeding infant death is [VAERS case 1166062](#) which lists Thrombotic Thrombocytopenic Purpura as one of the symptoms. Thrombotic Thrombocytopenic Purpura is a rare blood disorder in which blood clots form in small blood vessels throughout the body.

[...]

Here are a few more cases in VAERS where the COVID shot given to the breastfeeding mother apparently also affected the baby. Some of the cases of breastfeeding mothers getting the COVID shot report reduced milk flow, green milk, mastitis, thrombophlebitis in the breast, heavy menstruations even though breastfeeding, etc.

I am only including some of the cases here that affected the baby who was breastfeeding, and who did NOT get the shots but apparently had side effects from drinking the breast milk from their mothers who got the shots.

- 30-YEAR-OLD CONNECTICUT BREASTFEEDING MOTHER WITH 5-MONTH-OLD SON - VOMITING, DIARRHEA, BODY RASH, AND HEMATURIA**

[VAERS case 970309](#): Patient is breastfeeding her 5 month old son. Two nights after her 1st **Moderna** dose, he had violent vomiting, diarrhea, body rash, and hematuria (blood in urine).
- 36-YEAR-OLD CALIFORNIA BREASTFEEDING MOTHER - HIVES**

[VAERS case 999040](#) (Pfizer): Breastfed son have severe hives x5days.
- 31-YEAR-OLD CALIFORNIA BREASTFEEDING MOTHER WITH 4-MONTH-OLD-SON - DIARRHEA**

[VAERS case 1070803](#) (Pfizer): I was exclusively breastfeeding at the time of receiving both doses. My 4 month old son developed diarrhea on February 1st and it lasted 2 weeks. Lab work/stool studies were negative for any bacterial or viral infections.
- 38-YEAR-OLD NEW JERSEY BREASTFEEDING MOTHER WITH 3-MONTH-OLD DAUGHTER - SKIN RASH**

[VAERS case 1111787](#) (Pfizer): I am breastfeeding my daughter exclusively. She was born December 9, 2020. She is roughly 3 months old. She had an all body rash.
- 35-YEAR-OLD ALASKA BREASTFEEDING MOTHER WITH 12-MONTH-OLD INFANT - ANAPHYLAXIS SHOCK**

[...]
- INFANT BREASTFEEDING BOY IN ALASKA - ANAPHYLAXIS SHOCK**

[...]
- 34-YEAR-OLD CALIFORNIA BREASTFEEDING MOTHER WITH 11-WEEK-OLD INFANT BOY - APPETITE DECREASE, VOMITING**

[...]
- 40-YEAR-OLD BREASTFEEDING MOTHER WITH 1-MONTH-OLD INFANT - DIARRHEA FOR 36 HOURS**

[...]
- 29-YEAR-OLD NEW JERSEY BREASTFEEDING MOTHER WITH 15-MONTH-OLD CHILD - EAR INFECTION**

[...]
- 31-YEAR-OLD ILLINOIS BREASTFEEDING MOTHER WITH 10-MONTH-OLD SON - PERSISTENT FEVER OF 100 - 103 F.**

[...]
- 34-YEAR-OLD INDIANA BREASTFEEDING MOTHER WITH SON - SKIN RASH**

[...]
- 30-YEAR-OLD INDIANA BREASTFEEDING MOTHER WITH SON - RASH SPREAD FROM HIS STOMACH TO HIS ENTIRE BODY**

[...]
